

## **DHS S&T invites counter-UAS developers to submit tech for assessment**

It was announced from Washington, DC on 8 March that the Department of Homeland Security (DHS) Science and Technology Directorate (S&T) is inviting developers of counter-unmanned aerial system (CUAS) technologies to participate in technology assessments.

It is understood that a Request for Information – Participation (RFIP) was released for the 2017 Technical Assessment of Counter Unmanned Aerial Systems Technologies in Cities (TACTIC) programme.

Apparently, Selected C-UAS technology solutions will be assessed in an operationally relevant environment.

TACTIC will take place in two parts: the first, which will take place during Summer 2017, will be a familiarization assessment to allow technology developers to test their C-UAS systems under urban conditions and make changes as needed.

The second part, to be held in the Fall of 2017, will be an assessment to quantify C-UAS system performance.
