

eMaritime Group Release ACAT Course for the New Transas 4000 ECDIS

eMaritime Group, part of which is ECDIS Ltd, Corporate Member of IAIN, have further extended their ECDIS Annual Competency Assurance Training (ACAT) portfolio by including a course for the new TRANSAS 4000 ECDIS.

Available online as well as the new offline downloadable version, ECDIS ACAT is understood to be used daily by shipping companies globally.

At an average of only £8 per officer per year, the not-for-profit ACAT courses are fast becoming an essential tool for refreshing all training crew in the safe and efficient use of their onboard ECDIS systems and gaining competency certification on their Type Specific Model.

George Ward, Project Support, ECDIS Ltd commented: *‘The main goal of ECDIS ACAT is to keep crew up to date with the latest changes and features of their ECDIS system. It was therefore vital for us to release a new course for the TRANSAS 4000 as soon as possible. We will always aim to be on top of the latest releases from the world's leading manufacturers’.*
