

The International Navigation Conference 2017

Innovations in Autonomous & Resilient PNT

27-30 November, Brighton

London-based Royal Institute of Navigation informs that as well as the latest technical innovations and technology updates, INC2017 will cover the legal, ethical, human cognitive and regulatory issues associated with realising new opportunities.

Presentations, an exhibition and networking at RIN INC2017 are expected to broaden knowledge and provide a range of perspectives on topics as diverse as artificial intelligence, authentication, privacy, machine learning and augmented reality in location applications.

In addition, on 27 November the Resilient PNT Forum will meet in the afternoon, in partnership with RIN INC2017, following the very well attended meeting at RIN INC2016.

INC2017 programme is available here:
