

## **NAV CANADA reports September traffic figures**

Traffic figures for the month of September 2017 were announced from Ottawa on 16 October by NAV CANADA. These monthly figures are measured in weighted charging units for en route, terminal and oceanic air navigation services, in comparison to the prior fiscal year.

Air traffic in September 2017 increased by an average of 5.4% compared to the same month in 2016. September represents the first month of NAV CANADA's fiscal year which runs from 1 September to 31 August.

Weighted charging units represent a traffic measure that reflects the number of flights, aircraft size and distance flown in Canadian airspace.

### **About NAV CANADA**

On 5 October we were privileged to welcome NAV CANADA as an Associate Member of IAIN.

NAV CANADA is a private, not-for-profit company, established in 1996, providing air traffic control, airport advisory services, weather briefings and aeronautical information services for more than 18 million square kilometres of Canadian domestic and international airspace.

The Company is internationally recognized for its safety record, and technology innovation. Air traffic management systems developed by NAV CANADA are used by air navigation service providers in countries worldwide.

NAV CANADA is a partner in Aireon LLC, an international joint venture deploying a space-based Automatic Dependent Surveillance-Broadcast (ADS-B) system that will expand air traffic surveillance to all regions of the globe.
