

**The Royal Institute of Navigation's
International Navigation Congress**

INC 2017

27-30 November 2017 Brighton.

Latest programme now available

As well as the latest technical innovations and technology updates, the conference will cover the legal, ethical, human cognitive and regulatory issues associated with realising new opportunities.

The presentations, exhibition and networking at RIN INC2017 are designed to broaden knowledge and provide a range of perspectives on topics as diverse as artificial intelligence, authentication, privacy, machine learning and augmented reality in location applications.

In addition, on 27 November the Resilient PNT Forum will meet in the afternoon, in partnership with RIN INC2017, following the very well attended meeting at RIN INC2016.

It is reported that the latest programme is now available here:
