

## **IFAC Navigation Systems and Applications**

**29 January 2018, The Daniel Hotel, Herzelya, Israel**

IAIN Member Institute Israeli Association for Automatic Control (IAAC) advises that the Israel Navigation Systems and Applications Workshop and Exhibition is its biennial event organized to serve the wide audience of people in Israel interested in the navigation science and art.

This one-day workshop is dedicated to technical talks that range from fundamental research, to applications, to field test results. The related exhibition is a unique opportunity to bring together in one location the different industries and representatives offering navigation-related hardware.

In the words of Dr Hector Rotstein, Research Fellow at Rafael Advanced Defense Systems Ltd: *‘About 80 participants have already secured registration.*

*‘In addition 19 exhibitors will put together the largest exhibition dedicated to Navigation Systems, from inertial systems to GPS/GNSS, timing and other relevant equipment.*

*‘Register now!’*

*‘See you in Herzelya!’*

**It is understood that as a relatively large number of participants will be non-Hebrew speakers, lecturers have been asked to deliver their presentations in English.**
