

## **Conference on digitalisation 5 / 6 April**

### **Danish Maritime Authority gives heads up**

The Danish Maritime Authority is hosting the final conference of the EU-funded digitalisation project EfficienSea2 on 5/6 April.

It is reported that 32 partners from 12 countries have been collaborating in the European project EfficienSea2 since 2015 to create a more digital maritime world.

This project has focused on developing new communication platforms, international IT-standards and digital services for the maritime world. The project supports the effort recently initiated by the Danish Government through a plan for maritime growth and a digital strategy.

At the project's final conference in Copenhagen on 5-6 April the resolutions arrived at and communication platforms delivered will be presented and demonstrated.

High level representatives from BIMCO, IALA and the Danish Maritime Authority will also discuss the strategic perspectives of the project.
