

Operators and Inspectors spot a trend in gaps of seafarers' basic knowledge in ECDIS.

It is understood from IAIN Member ECDIS Ltd that seafarers' results during on-line 1.27 Generic tests almost perfectly agree with the recently published list of observations made by Port State Control inspectors.

Apparently there are still knowledge gaps, in particular with the new S52 PL 4.0 updates.

ECDIS Ltd report that over 1000 users in August 2018 alone refreshed their annual competency in IMO ECDIS 1.27 Generic tests with the company's renowned course which is now on-line at a non-profit price, or available for download.
