

Offshore Survey 2019

National Oceanography Centre, Southampton 10-11 April 2019

Calls for Abstracts Deadline of 14 December

The sixth Offshore Survey conference will take place alongside Ocean Business at the National Oceanography Centre in Southampton, UK, from 10-11 April 2019.

Readers are advised that there are less than four weeks until the deadline on 14 December.

Offshore Survey is one of the year's most popular industry and professional conferences. It has gained a reputation for attracting the very best papers, with a unique mix of global technology and business.

This conference offers a golden opportunity to share cutting edge information and the organisers welcome submissions for sessions on:

- Subsea Positioning;
- Hydrographic and Seabed Systems;
- Survey Operations;
- Data Processing and Visualisation; and
- Industry and Professional Issues.

For detailed information about the session topics and to submit abstracts online, readers are invited to visit: www.oceanbusiness.com

This conference will be chaired by Gordon Johnston, Vice-Chair of Commission 4 – Hydrography at the International Federation of Surveyors (FIG), and Director of Venture Geomatics.

He commented: *'It is an honour to be involved in developing an event that has built a reputation of great technical and content rich reputation. The growing awareness of the importance of our seas and oceans along with the developing technologies and trends, offers an opportunity to really showcase new ideas, update the experiences and prime the all so important network discussions around our business.'*

Johnston will be working with a committee of global industry and academic experts to evaluate the abstracts. As well as this, the conference will be fully

supported by partners, the Hydrographic Society and *Hydro International*, to ensure an exceptional event for the industry. The final programme will be revealed in January 2019.

One of the special attractions of Offshore Survey is that it runs alongside Ocean Business, which provides a high calibre three-day exhibition of technology and services, with a full programme of training and demonstration workshops, providing an unrivalled opportunity to learn at the same time as trying the latest technologies. Ocean Careers will also run over the three days to provide advice on career opportunities within the ocean technology, marine science and offshore industries. As always, the combined events bring a lively social programme for networking with colleagues old and new.

Full details about Ocean Business and Offshore Survey can be found online at: www.oceanbusiness.com

Abstracts must be submitted by 14 December to be considered for Offshore Survey.
