The Israel Association for Automatic Control (IAAC) have advised prospective delegates to register for the INWE 20 conference before 20 January to receive the discounted early bird price.

A registration form in both English and Hebrew is available here:

http://iaac.technion.ac.il/events.html

As IAAC state in their recent reminder: ‘Please share the programme with other people interested in navigation systems.’

A record number of 20 companies will be presenting their products in the exhibition.

IAAC continues: ‘Makes sense: it is 2020! Please find attached a map of the exhibitors to help you plan your visit. Moreover, more than 100 people have already registered to attend, coming from all over the Israel Navigation community.

‘In the name of the IAAC, we hope to see you in INWE20!’

2020 Israel Navigation Workshop and Exhibition (INWE20)
Final Announcement

The Israel Navigation Workshop and Exhibition (INWE20) is a biennial event organized and sponsored by the Israel Association for Automatic Control (IAAC).

For those not familiar with the association, the IAAC is a non-profit organization congregating a large number of members from Academy and Industry interested in the broad areas of Control and System Theory. IAAC is also a member of IAIN.

Readers are invited to check the webpage: http://iaac.technion.ac.il/home.html for further details and the opportunity to subscribe to the IAAC mailing list.

Following the huge success of previous events (more than 200 participants and 20 companies participating in the exhibition in 2018), the 2020 edition of the
Israel Navigation Workshop and Exhibition has been scheduled for 27 January at the Daniel Hotel in Herzliya.

INWE20 will be a one day event dedicated to technical talks in navigation systems, ranging from fundamental research, to applications, to field test results. Topics of interest include navigation, positioning and timekeeping in all their variations, sensors, systems, optimal integration of multiple sensors, and novel or emerging technologies in the field of navigation.

In parallel with the talks INWE20 will host a technical exhibition in which navigation equipment manufacturers and suppliers will have the opportunity to show their current products and most recent technical innovations. Visitors can expect to see the latest, most innovative navigation products and services from top navigation companies.

Finally, the event will bring together the large community of researchers, suppliers and users in the navigation area in Israel, making it a unique opportunity to meet all the who’s who in the navigation field in the country.

The INWE20 will have two tracks:

2. Navigation Sensors and Systems Exhibition, in which companies in the navigation marked will have the opportunity to show their products. The exhibition is organized by Dr Hector Rotstein, Research Fellow, Rafael Advanced Defense Systems Ltd. (hector@rafael.co.il). See the list of participating exhibitors in the preliminary programme.

Deadlines
- 15 January: submission of lecture slides
- 27 January: INWE20

In the final sign off from IAAC: ‘We are looking forward to see you.’
