Gyroscopy and Navigation
http://pleiades.online

IAIN Associate Member, the International Public Association “Academy of Navigation and Motion Control” informs us that the latest issue of the Gyroscopy and Navigation journal is now available.

Gyroscopy and Navigation is a peer-reviewed quarterly journal published by the International Public Association “Academy of Navigation and Motion Control” and the State Research Center of the Russian Federation Concern CSRI Elektropribor, JSC, in cooperation with Pleiades Publishing, Ltd, since 2010.

It is available in printed form (ISSN 2075-1087) and online (ISSN 2075-1109) versions.

The journal publishes original papers, review and analytical papers and short communications, which have not been published before nor submitted for publication in other journals.

Main topics:

- Inertial sensors, navigation and orientation systems;
- Global navigation satellite systems;
- Integrated INS/GNSS navigation systems;
- Navigation in GNSS-denied environments and indoor navigation;
- Gravimetric systems and map-aided navigation;
- Hydroacoustic navigation systems;
- Navigation and sonar data processing;
- Navigation devices and sensors (logs, echo sounders, magnetic compasses).

Gyroscopy and Navigation journal is based on a Russian-language journal with similar name, which dates back to 1944. To date, articles by the authors from more than 30 countries have been published, and this tradition will be continued.

The Editor-in-Chief is Vladimir G Peshekhonov.
